Introduction	Supported grammars	Examples
	$\bullet r = (s)$	• (a b)*
Convert simple regular expressions to minimum deterministic finite automaton. (Regex => NFA => DFA => Min-DFA)	• r = st	• (a* b*)*
	• r = s t	• ((∈ a)b*)*
	• r = s*	(a b)*abb(a b)*
	• r = s+	
	• r = s?	
	• r = €	
	(Copy this character to input if needed)
